**Technologies/Frameworks:** GitHub, ReactJS, Redux, NodeJS, Git

## PROJECTS

**Podcast Platform** 🎧 | REACT, React-Router-Dom, FIREBASE, REDUX Toolkit 10 2023

- Developed An online Podcast Platform. Featuring podcast CRUD operations, a custom Music Player
- Sign-Up & sign-in page Using Firebase's authentication function, verify the user's email and password.
- Save user details in the database. Profile Podcast & Episode Details
- podcast creation Firebase authentication, Firestore, and storage.
- After successful signup or login, navigate the user to their profile page.

**Crypto Tracker App** 🎧 | ReactJS, Material UI, ChartJS, Framer Motion, Axios, React Router 11 2023

- I've Built a crypto tracker using ReactJS in which we can compare different crypto currencies, see the graphs of prices, total volumes, market cap, etc.
- I've build a pagination component for a cryptocurrency dashboard using Material-UI
- It can search from the top 100 Crypto Currencies in real time and add them to your watchlist as well.
- created a responsive line chart for a cryptocurrency tracking & Implemented getCoinPrices function to fetch data based on the selected price type.
- compare page component with two selects for the cryptocurrencies, fetching and displaying data for each coin, and optimizing performance by fetching only the necessary data.
- I've used local storage to save user preferences and incorporate React Toastify for feedback.

**React Calculator** 🎧 | REACT HTML5 CSS3 08 2023

- Simple React calculator that uses React Hooks, specifically the useState hook.
- Developed a React Calculator which performs four arithmetic operations.
- Functional React calculator that makes use of the useState hook and properly handles input validation and displaying results.

## INTERNSHIP

**Pantech Solutions** 09 2021 – 10 2021  
*Python Master Class* Pune, India

- Learnt the Python Language in 30 days of vigorous hard work and continuous practise.

## CERTIFICATIONS

- TCSiON Young Professionals
- Barclay's GTT Connect
- Programming, Data Structures And Algorithms Using Python
